Dear Secretary Glickman:

I strongly urge the passage of legislation and policies to mandate the clear and accurate labeling of all foods derived from, processed with, containing or consisting of genetically engineered organisms before they are released into any and all commercial markets.

A growing number of scientists and physicians are voicing concern over the possible health and environmental risks from these foods. Current laws and policies do not require the food industry to label these new genetically engineered foods. Without labels I lose the freedom to choose what I will eat and what I will feed my family. ***I have a right to know.***

Sincerely,
